FOR AN ACCURATE RECOMMENDATION PLEASE COMPLETE IN FULL!

PROCEDURE FOR TAKING SAMPLE:

Let water run from cold water tap for sufficient time to get fresh water from water source. Fill container completely. When water treatment equipment is in place, sample should be drawn before installed equipment to insure untreated water.

NOTE: Lancaster Water Treatment is not equipped to test water for contamination. This must be done by a State approved lab. We will assume the water not to be contaminated unless advised otherwise.
