

For beautiful water and superior solutions, you can count on us.

Superior water treatment solutions to satisfy you and your most demanding water treatment applications.

Homeowners want beautiful water: safe, pure, clean, crystal-clear, odor-free, and good tasting. And to keep beautiful water flowing from the tap, they expect you to supply perfect solutions. Lancaster Water Treatment has built an outstanding reputation among plumbing contractors and consumers.

Responsive Customer Service

As a manufacturer with deep experience in water treatment, we are flexible, and highly responsive to our customers.

Water analysis. We perform fast, accurate water analysis that identifies specific solutions.

Tech support. When you have a question or a problem, call, and we'll trouble-shoot with you right over the phone.

Highest Quality Products

Total solutions. The breadth and depth of our product line allows us to provide a total solution by picking just the right equipment for the job.

Proven, dependable performance. For over 47 years, Lancaster Water Treatment has delivered outstanding customer satisfaction in our products and services.

Highest quality. Our products are engineered, designed, and built to last. Our total quality standards give you that assurance.

We provide superior solutions to common water problems...

	Hardness	Hard water scale build-up damages all water-using appliances and clogs plumbing	
	Excessive minerals (TDS)	Total dissolved solids leave a dull residue on all washable surfaces	
	Low pH	Acidic water eats away at pipes, appliances, water heaters and boilers	
	Iron	Red stains appear on sinks and tubs and water has an unpleasant taste	
	Bacteria, Nitrates	Presence can cause serious illnesses	
	Hydrogen Sulfide Gas	Gases that cause rotten egg odors	

We make a complete, proven line of innovative water treatment equipment of the highest quality, backed by responsive customer service and strong sales support.

Ultraviolet Purifiers

The chemical-free method of using ultraviolet light to make the water bacteria-free. UV energy works like

concentrated sunlight to naturally destroy many harmful micro-organisms at point-of-entry.

Softeners

Different areas of the country, rural in-ground water supplies and even municipal water systems have different water hardness problems.

We make softening solutions for residential and commercial applications.

Acid Neutralizers

When a water's pH is too low, it can corrode plumbing pipes and fixtures.

Our neutralizers correct problems associated with highly acidic waters.

Reverse Osmosis Systems

For cleaner drinking water, our systems are a convenient and efficient way to remove unwanted contaminants and impurities. Our four-stage state-of-the-art NSF certified RO Systems are easy to install and highly valued.

Our designs are very compact, and have advanced features that deliver the ultimate in clean, fresh-tasting water.

AquaNue Aerators

Our newest method of chemical-free water filtration is featured in our AquaNue series. They're especially effective in removing iron deposits and unpleasant smelling

hydrogen sulfide gas through air injection filtration. They solve the most demanding iron contaminant problems.

Filtration Systems

We make a large variety of filtration equipment, from carbon to sediment to iron filters for solving water contaminant problems.

Innovative Design

Design drives everything. It's where beautiful water begins—combining our water treatment knowledge, engineering skills, and the relentless application of ingenuity.

Continuous improvement. At Lancaster Water Treatment continuous research and development of new products is a way of life. Electronic valve design and our new AquaNue chemical-free water filtration systems are examples of innovative thinking.

Strong Sales Support

The features and benefits of our water treatment solutions are vital for building confidence in our brand. Dealers and homeowners alike can have confidence in using our equipment.

Training. We've developed a comprehensive, certified installer program that helps our dealer network serve water treatment challenges and problems. The Aqua Technician designation assures high-quality installation.

Experienced sales team. Lancaster Water Treatment sales representatives are knowledgeable, well-trained, and experienced, specializing in water treatment.

For beautiful water and superior solutions, you can count on us.
